THE UNIQUE VYKON DESIGN

Introducing Vykon. The revolutionary design combines a unique tapered "5 angle" masterpiece shape with a distinctive "step back" carbon tip on the "Original system" and further unique styling with the "Slash cut" carbon tips. Performing at the pinnacle of the Motorcycle and Side x Side exhaust manufacturing, always striving to set new industry standards. Crafted using only the finest raw materials, aerospace carbon and premium 304 & 430 stainless steel. Vykon exhausts exemplifies durability and performance. Manufactured in South Africa, Vykon blends Old School Craftsmanship with cutting-edge technology, backed by the expertise knowledge of Air Age Engineering established in 1968 and tested by Anassis Racing the multiple SA Road Race & Drag race team, headed up by Brad Anassis.

Vykon offers a wide range of fitments for various motorcycles. Slip-On's for Adventure motorcycles & Side x Side's that easily attach to the OEM headers using the Vykon link pipe to Full Exhaust systems for most modern Superbikes. Experience enhanced power, improved torque and a captivating exhaust note that turns heads. Join the select group of riders who choose Vykon to elevate their ride and unleash the true potential of their motorcycle & Side x Side.

THE HISTORY BEHIND THE COMPANY

The Anassis name has been synonymous with producing high-performance motorcycle exhaust systems from as far back as the 1960's. Those of us fortunate to have met and known Gerry Anassis, Brad's Father, who sadly passed away in 2020, can testify to his legendary engineering prowess. Gerry built some incredible two-stroke drag bikes which he campaigned with considerable success back in the '70s and '80s. Gerry founded Air Age Engineering, started manufacturing performance exhaust systems in 1968. A full line up of industrial manufacturing from turning, mandrel bending, and inhouse casting that led to the building of a complete four-cylinder big bang two stroke engine.

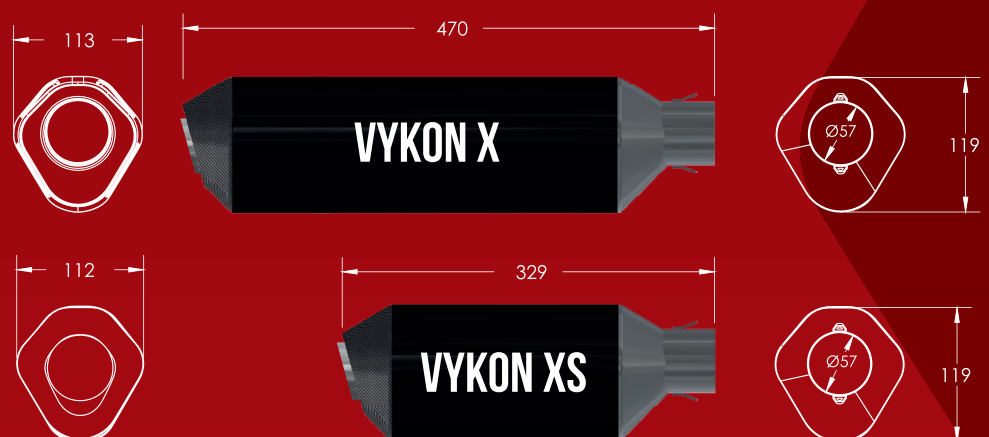

Brad grew up working in the factory from the young age of 5. Gerry taught him the very basics of exhaust flow and handcrafted metal work to be able to understand the "old school" hand crafted method of manufacturing exhausts, along with operating the machinery in the Air Age exhaust factory.

With the wisdom of hindsight, along with a technical schooling background, it was probably inevitable that Brad would gravitate towards exhaust manufacturing. The result was the Vykon family of exhausts. The Anassis Air Age legacy birthed what Brad calls "old-school technology with a modern new-age look" all captured within the Vykon brand.

PRODUCTS & INFORMATION

Stainless 304 Tube – Thin Wall Full System

Stainless 430 Double Coated/E-coat & Powdercoat Shell

FULL SYSTEMS

- 3 Cylinder
- 4 Cylinder

SLIP ON LINK KITS

**Vykon Full & Slip On Systems
are available for:**

BMW
Can-Am Maverick
Ducati
Honda

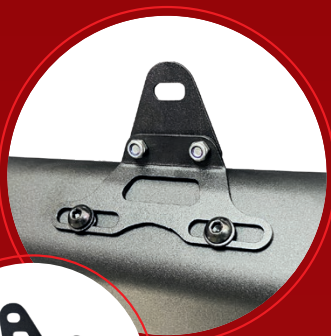

Husqvarna
Kawasaki
KTM
Polaris RZR

Suzuki
Triumph
Vespa
Universal

HANGER MOUNTING BRACKET SYSTEM

Vykon's unique multi-adjustable "Hanger Bracket System". This design allows for various fitment positions. The multiple custom "Tip plates" can be rotated to accommodate and reach various mounting positions to suit any fastening position possible on your motorcycle.

CARBON COVERS

Short

Long

DB KILLER

Decibel Sound Dampening System

The Vykon acoustics can be quietly transformed by using the DB killer noise reduction unit.

SIDE x SIDES ADVENTURE

Polaris RZR

Can-Am Maverick
